

# Measuring device for Contact Angle

## Brief description

- Measuring device for sample check resp. for 100% check

## Measuring task

- Measurement of contact angle, vertical clearance

## Technology

- tactile
- dynamic

## Special features

- loading/unloading: manual
- retrofitting: manual
- self-locating touch by means of a high-precision, exchangeable ball
- flexible application for different outer race and ball hub types (UF, VL, AC, ...)
